# When's Your Birthday?

## Calendars Tell so Much!

A calendar is a way to order time. Calendars put the year in order by days, weeks and months. There are seven days in a week. Can you name them?

Sunday was named after the sun. Monday was named after the moon. A year has twelve months. Let's say the months of the year.

| January |        |         |           |          |        |          |
|---------|--------|---------|-----------|----------|--------|----------|
| Sunday  | Monday | Tuesday | Wednesday | Thursday | Friday | Saturday |
|         | 1      | 2       | 3         | 4        | 5      | 6        |
| 7       | 8      | 9       | 10        | 11       | 12     |          |
| 14      | 15     | 16      | 17        | 18       | 19     |          |
| 21      | 22     | 23      | 24        | 25       | 26     |          |
| 28      | 29     | 30      | 31        |          |        |          |

## When is Your Birthday?

Use the calendar for a birthday countdown. What month is your birthday? What day of the week is your birthday on this year?

## The Calendar

A year has 365 days. What year is it?  
A calendar can tell us when holidays are. A calendar can tell you when your birthday is.  
What is today? What will tomorrow be?

## How old are you?

You will be one year older on your birthday. How old are you now? How old will you be on your next birthday?

## Review and Learn

**It's Your Birthday!**  
 Birthdays are super fun!  
 You have cake and presents.  
 You might have a party.  
 Draw a picture to show how you celebrate your birthday.

Put a mark on these days on the calendar:

a birthday      a full moon      soccer game day      fishing trip day
